

PRESIDENT
OF THE CENTRAL OFFICE OF MEASURES

Jacek Semaniak

Warsaw, 7th October 2021

DWM-WWM.073.9.2021

Prof. Pavel Neyezhnikov
General Director
National Scientific Centre
"Institute of Metrology"

Dear Prof. Pavel Neyezhnikov, dear staff of the National Scientific Center Institute of Metrology "Institute of Metrology",

On behalf of all employees of the Polish administration of measures, I would like to extend my best wishes to you and all your staff on the occasion of the celebration of the 120th anniversary of the National Scientific Centre "Institute of Metrology".

On this occasion, I would like to emphasize that Central Office of Measures appreciates the possibility of establishing cooperation with an institution with such deep roots.

The activity of National Scientific Centre makes that important areas such as, among others, industry and trade can develop. As we all know, modern economy, industry as well as a modern country cannot function without reliable measurements. Thanks to activities of your institute, both in scientific and legal metrology Ukraine can be sure that this tasks are realized fully professional.

Central Office of Measures in Poland would like to express its appreciation to the National Scientific Centre activities in domestic, as well as in international area. Postgraduate PhD school within NSC is the best example of giving young people the opportunity to broaden their knowledge and to making employees developing their career. This is possible thanks to the possibilities given by NSC "Institute of Metrology". This makes sure, that NSC Scientific Centre will always have fully professional, engaged staff.

Additionally, I would like to emphasize that Central Office of Measures also appreciates valuable activities of the National Scientific Centre in the international area, especially in the COOMET organization and important personal role of Prof. Neyezhnikov as the Vice-president of COOMET. We are happy that after joining Ukraine to OIML and Metre Convention we can cooperate together as a "full" members of this organizations.

Last visits of the NMI's representative from PTB and Bureau of Metrology from Macedonia shows intensity of international cooperation of NSC "Institute of Metrology".

Definitely, we made a big step to intense our further cooperation signing a formal Memorandum of Understanding between our institutions in 2019. 3 months study visit in GUM of NSC employee, Ms. Kateryna Hovorova was a practical example of realisation this agreement, with mutual benefits.

In conclusion, I would like once again to express my sincere wishes and willingness to further strengthen the cooperation between Central Office of Measures in Poland and National Scientific Centre. We wish every success in business and private life for all NSC Institute of Metrology staff.

Yours sincerely,

A handwritten signature in blue ink, appearing to read "Jacek Szwarc". The signature is written in a cursive style with a long, sweeping underline.
